

## CANDIDACY STATEMENT FOR IASP ELECTION 18-19

**Dr. Brijesh Pratap Singh**

I did Ph. D. in Statistics from Department of Statistics, Banaras Hindu University, Varanasi. My Ph. D. work was based on modeling and analysis of human reproduction process. After completing my Ph. D. work, I joined Research Associate in a project funded by NIH, USA and then another project funded by ICMR, New Delhi. In 2006, I came into teaching profession and right now, I am Associate Professor in the Department of Statistics, Institute of Science, Banaras Hindu University, Varanasi.

I am actively associated with Population Studies from last 20 years as a researcher and teacher. I am also a member of IASP since then. My field of research has been both the theoretical research in Statistical Demography as well as application and development of Statistical tools for applied research in different area of the subject of Population Studies such as fertility, infant mortality and related issues.

In recognition of my research, I have published 118 research papers in the field of Statistical Demography in International and National Journals of repute and edited two books also. I have visited USA, Thailand, Malaysia, Bangladesh and Nepal for presenting the research papers in the conferences along with the several conferences in India as well.

Presently, I am serving my duties as Managing Editor of the official journal of IASP, i.e. Demography India from 2016. Now the Demography India is online and on time, which saved huge money of IASP.

My aim is to strengthen and promote the activities of IASP by solving the challenges of the present day population problems through seeking the advice of senior as well as young demographers. Also I would like to search opportunities in various areas for the people working in the field of Population Studies.

Thanking you. With best regards,
